

Eekels realises electro-technical and mechanical engineering solutions for shipbuilding and industry. Meanwhile Eekels has more than 100 years' experience in both market segments, **Marine & Offshore** and **Industry & Infrastructure**. With more than 550 employees, Eekels achieved a turnover of almost 80 million euros in 2015. A growing share of the turnover comes from abroad.

#### Part of TBI

Eekels is a TBI company. This vast network of companies is active in Technology, Construction and Infrastructure. The companies operate both independently and through partnerships. With 5,800 employees, TBI realized a € 1,557 million turnover in 2015.

#### Expertise

Eekels has specific expertise in the areas of electro-technical propulsion systems, shore power connection systems, shipping systems (including alarm and monitoring systems) and process automation. Moreover, with its Mechanical Unit, Eekels has more than 60 years' of experience

in specialised machine building and mechanical service and maintenance activities. Eekels can fully handle complex projects, from engineering, panel building and installation up to and including commissioning, maintenance and service.

## ABOUT EEKELS

Eekels is firmly rooted in the region, as is clear from our customer base and reference projects. In the past decades many traditionally northern industries have experienced (technical) development, and Eekels has often played a part in this. Not only do the Eekels services and systems find their way into the process industry but also quite often to the engineering industry and infrastructure.

### Process industry

We have extensive experience in technical installations used for the extraction of oil, gas and other minerals, within the chemical industry, in the production of concrete, bricks, glass, paper and cardboard, and in the industrial processing of agricultural products. Sectors such as Food and Pharma, in which very different dimensions of precision and reliability play a role, manage to find their way to Eekels.

### Mechanical engineering companies

Manufacturers of machinery seek out Eekels for our unique knowledge of propulsion and control. We have specific experience with various equipment such as cranes and pile-drivers, wrapping machines, measuring instruments and custom-made machines.

### Infrastructure

The Netherlands has a reputation for water management in all its manifestations. Eekels has extensive experience in infrastructural projects in the field of water purification and drinking water treatment. We also excel in control of bridges, locks, reservoirs and pumping stations. In all industry sectors we have proven to be able to get to the heart of what our customers are working to achieve and what their needs are. We have discovered that this experience is possibly even more important than pure technical knowledge. This is why we can unreservedly say: we embrace every industry sector and challenge that comes our way.
