

Eekels realises electrotechnical and mechanical engineering solutions for shipbuilding and industry. By now Eekels has more than 100 years of experience in both market segments, **Marine & Offshore** and **Industry & Infra**. With more than 550 employees Eekels achieved a turnover in 2015 of almost 80 million euros. An increasing part of the turnover comes from abroad.

Part of TBI

Eekels is part of TBI. This extensive network of companies is active in Technology, Building and Infrastructure. The companies operate independently as well as in joint ventures. With a total of 5,800 employees, TBI realised a turnover of €1,557 million in 2015.

Expertise

Eekels has specific expertise in the field of electrotechnical propulsion systems, shore power connection systems, shipping systems (including alarm and monitoring systems) and process automation. Eekels' unit Mechanical offers 60 years of experience in specialised machine building,

and mechanical service and maintenance activities. Eekels can fully handle complex projects, from engineering, panel building and installation up to and including commissioning, maintenance and service.

Eekels is known worldwide as a supplier of electrotechnical systems and services for Marine & Offshore applications. The company has its foundation in the knowledge-intensive North-Netherlands shipbuilding sector. Ever since the twenties of the previous century, Eekels has been supplying reliable electrotechnical installations to merchant ships, developing into an innovative co-producer of shipping concepts. Eekels supplies technologically high-grade installations for:

Merchant vessels

Oil tankers, dry cargo ships, car carrier ships, multi-purpose ships, and a multitude of other vessels. Shipowners and crews can blindly rely on these systems, and technicians can easily maintain them on board.

Offshore

Supply ships for offshore platforms, cable layers, seismic research vessels, often with specific systems, such as crane control with active heave compensation.

Yachts

Electrotechnical installations for super yachts; Eekels makes a substantial contribution to revolutionary yacht concepts in the very top segment.

Marine ships

With marine ships especially nothing is left to chance. These vessels rely on Eekels' specialist power electronics and its proven alarm systems.
